**Re: Support for the Completion of a Master Environmental Assessment (MEA) on single-use (plastic and paper) and reusable bags.**

Dear Secretary Schuchat and Members of the California Ocean Protection Council:

Ballona Creek Renaissance (BCR) commends the California Ocean Protection Council for its leadership in addressing critical issues facing California's coast and ocean including marine debris. Please accept our support for the recommended action to complete a Master Environmental Assessment (MEA) on single-use (plastic and paper) and reusable bags. This MEA will provide the necessary background information for California municipalities to quickly complete Environmental Impact Reports (EIR) necessary for the development of new ordinances placing restrictions on usage of the single-use bags.

As you know, the Ocean Protection Council has clearly identified that single-use plastic bags significantly contribute to the serious litter and marine debris problem facing the state. For that reason, OPC's Ocean Litter Implementation Strategy includes as Priority Action #2 a call for a prohibition on single-use products such as plastic bags.

Many California cities have heeded this call for action and are developing ordinances intended to minimize or eliminate single-use bags through the adoption of bans on plastic bags and, in some cases, fees on paper bags. However, a ruling issued February 20, 2009, in Los Angeles County on a challenge under CEQA to a municipal plastic bag ban now requires that municipality to complete an EIR before it can implement its ban.

Other cities considering similar ordinances will likely be required to do the same in order to avoid the same result. Completion of an MEA on single-use bags will greatly simplify the EIR process for these cities, allowing them to incorporate the MEA into their individual EIRs, saving time and money, and facilitating the implementation of single-use bag regulations throughout the state. Thank you for considering our input.

Sincerely,

Jim Lamm, President
